KISHAN RAJ DIVYAM

bioluminescence054@gmail.com | +91 8977230709
Portfolio | LeetCode | CodeChef | GitHub | LinkedIn

Summary

Final-year B.E. IT student with strong problem-solving skills (1870 LeetCode rating) and hands-on experience in backend development, LLM-powered applications, and distributed systems. Contributed a production fix to the open-source AWS CDK framework and built scalable software solutions spanning full-stack development and cloud-native architectures.

Education

Army Institute of Technology, Pune 2023 – 2027
Bachelor of Engineering (B.E.), Information Technology **CGPA:** 8.54/10

Technical Skills

Core CS: Data Structures & Algorithms, Object-Oriented Programming, System Design, Database Management System, Operating Systems, Computer Networks
Languages: C++, Java, Python, SQL, Bash
Frameworks: Spring Boot, Node.js, React.js, Express.js
Databases: MongoDB, MySQL
AI/ML & LLM Engineering: LangChain, RAG, Embeddings, Vector Databases, Tool Calling, Model APIs
DevOps & Infra: Docker, Kafka, gRPC, Terraform (IaC), CI/CD, Git, GitHub, Postman

Experience

Backend Developer Intern | Parakozm Mar 2026 - Jun 2026
Blogging Platform Engineering
- Implemented **server-side workflows** for account management and article publishing, designing **API routes** for content creation, retrieval, updates, and deletion using Node.js and Express.js.
- Structured **MongoDB data models** for users and articles, integrating credential protection, **access control**, input sanitization, and paginated queries to support secure and efficient content delivery.

Open Source Contributor - AWS CDK (GitHub) Jul 2026 - Sep 2026
Hashing Mechanism Integration
- Resolved AWS ECS CloudFormation synthesis bug in the AWS CDK framework by implementing automated container deployment triggers during underlying EC2 **Auto Scaling Group** instance mutations.
- Incorporated a deterministic hashing mechanism injected into the **Ec2Service** construct to force **CloudFormation** to register strategy changes, validated with **aws-ecs** test suite.

Accenture Innovation Challenge Mar 2025 - Jun 2025
RAG-Based Career Intelligence & Graph Algorithms
- Developed an LLM-powered career recommendation pipeline using **LangChain**, **prompt engineering**, and **RAG** to generate personalized career roadmaps, contributing to a **Top 10%** finish among 100,000+ national competitors.
- Designed a semantic retrieval workflow using **embeddings** and **vector databases**, integrating retrieved competency data with **Node.js** APIs and **MongoDB** to support skill matching and graph-based career path recommendations.

Technical Projects

Distributed Collaborative IDE React, WebSockets, Node.js, Express.js, MongoDB, REST APIs | **GitHub**
- Engineered a real-time collaborative code editor leveraging **WebSockets**, supporting multi-user live editing and instant synchronization, reducing latency by **15ms** across devices.
- Built a robust backend execution engine with multi-language support and **MongoDB** session management, reducing build times by **20%** and optimizing collaboration.

Patient Management Portal Spring Boot, Microservices, gRPC, Kafka, Docker, AWS | **GitHub**
- Developed a scalable microservices ecosystem using **gRPC** and Apache **Kafka** for event-driven streaming, reducing inter-service communication latency by **35%**.
- Crafted a secure API Gateway with **JWT Auth** and **CloudFormation** (IaC) which cuts provisioning time by **50%** through triggered AWS deployment.

Achievements

- **LeetCode:** Knight - **1870** Rating, Top 5% Globally
- **CodeChef:** Achieved **3**-Star, Max Rating: 1710 / Division 2 over worldwide participants.
- **Distributed Collaborative IDE:** 350+ users, running real-time multi-user sessions in production.
- **State-Level Badminton Championship:** Secured Silver Medal in U19 category.
